

Supriya Mutharasan

FEDERAL GOV. IT-01 · TECHNICAL SUPPORT ANALYST AND POWERAPPS DEVELOPER

Markham, Ontario, L3S1Z9, Canada

☎ (+1) 647-717-8115 | ✉ supriyamutharasan@gmail.com | 🏠 <https://smutharasan.github.io/> | 📱 smutharasan | 🌐 supriya-m-a2a276139

Summary

Full-stack cloud developer specializing in scalable web applications, CI/CD pipelines, and AI-driven automation to enhance business performance. Experienced in leveraging cloud services for file management, e-commerce, and workflow automation. Skilled in code-driven storytelling, effectively translating technical solutions into business impact.

At Shared Services Canada, optimized the centralized mailing inbox with Power Automate scripts, reducing human error. Improved onboarding and service delivery with a 200+ term Power BI Glossary, contributing to the business architecture document and key training materials.

A two-time hackathon winner recognized for designing innovative, automation-driven solutions. Dedicated to problem-solving, cloud automation, and streamlining processes to drive efficiency and impact.

Skills

Automation & CI/CD	Power Automate, Shell Scripting, GoLang, PowerShell, Bash
Programming Languages	C#, C++, Java, Python, Go, SQL, NoSQL, NodeJS
Database Management	PostgreSQL, SQL, MongoDB, Firebase, DynamoDB
Low-Code Platforms	PowerApps, Power BI, SharePoint, DotNetNuke
Tools & IDEs	Visual Studio, IntelliJ IDEA, Git, Docker, Netlify, Vercel

Work Experience

Ontario Power Generation (OPG)

Darlington, ON

FULLSTACK SOFTWARE DEVELOPER

July 2025 – PRESENT

- Modernized a legacy SSRS/RDL reporting pipeline by delivering a centralized Project Management web app that replaced multi-minute SQL-driven reports with optimized APIs, reducing report generation to seconds and automating L1/L2 PDF creation for director-level reviews.
- Replaced a license-dependent PowerApps solution with a scalable full-stack Workbench application (C#, Angular, Kubernetes), eliminating per-user licensing costs and improving performance and scalability for 200+ users through AD-based authentication.
- Enhanced usability by developing custom EBX UI forms and business rules, increasing user adoption and reducing data entry errors by approximately 30%.
- Streamlined project oversight through automated email alerts and workflow automation, cutting manual coordination effort for Project Managers and accelerating issue resolution timelines.

Amazon Web Services (AWS)

Toronto, ON

SOLUTIONS ARCHITECT INTERN

May 2025 – Aug 2025

- Designed and supported scalable, secure, and cost-optimized AWS architectures for customer workloads, aligning cloud solutions with over 10+ technical and business objectives.
- Conducted hands-on walkthroughs and labs to upskill customer engineering teams on IAM, serverless architecture, VPC networking, and analytics services.
- Shadowed customer discovery sessions and contributed to cloud solutioning by asking strategic questions that uncovered underlying technical challenges.

Shared Services Canada (SSC)

Ottawa, Canada (Remote)

POWERAPPS AND POWER BI DEVELOPER AND TECHNICAL SUPPORT ANALYST

Jan. 2023 – Sept. 2024

- Enhanced transparency and accountability, reducing unresolved issues by 25%, by implementing a centralized tracking system built with PowerApps, integrating advanced search using business logic rules, and automating reminders for critical deadlines via Power Automate.
- Increased adoption of a centralized tracking system by 30% through the creation of over 10 comprehensive user guides, infographics, and organizational growth visuals, clarifying system benefits and easing integration for stakeholders.
- Developed a Power Automate flow to standardize and process over 250 monthly business request emails, categorizing them by attributes like client and environment type using hash tables, improving assignment accuracy and reducing intake team workload.
- Leveraged Excel features like VLOOKUP to analyze historical BR data, identifying trends in milestones such as CRQ dates and delays, providing actionable insights to optimize processes and improve planning.
- Developed bilingual, searchable Power BI glossary containing over 200 terms, thereby provided a single source of truth that streamlined onboarding, improved team alignment, and reduced reliance on live instruction.

Toronto District School Board (TDSB)

Toronto, Ontario

DOTNETNUKE C# WEB DEVELOPER

May 2021 - Dec. 2022

- Enhanced the public-facing website's AODA compliance by using website crawlers like SiteImprove and custom scripts to scan HTML attributes, improving accessibility across the board's online presence.
- Remediated and quality-tested over 100 web pages, 50 school websites, and 20 DotNetNuke C# web modules under time pressure, ensuring AODA compliance by adhering to WCAG standards.
- Consulted with over 20 school principals and marketing officers to design and update public site webpages and school sites, improving website design and content.

Projects

MyFileBackPack (Home Lab) - AWS Developer

- Designed and developed a scalable microservice API for text and image fragment management with authentication and authorization via AWS Cognito and IAM.
- Reduced request latency by 30% by implementing DynamoDB and S3 storage with optimized data models and access patterns.
- Deployed containerized services on AWS ECS and Elastic Beanstalk, enabling reliable orchestration and integration through the AWS SDK.

PantryPal (Hackathon Project) - Junior Solutions Architect

- Delivered a production-ready cloud deployment using Azure Static Web Apps and GitHub Actions CI/CD pipelines across DEV, TEST, and PROD environments.
- Created a cloud architecture document outlining system design, deployment flow, and service responsibilities to support stakeholder decision-making.
- Designed a MongoDB NoSQL data model to support efficient storage and retrieval of pantry items and recipe data for end users and chefs.

Certificates & Awards

2025 **AWS Certified AI Practitioner - Foundation**, Amazon Web Services (AWS)

2025 **AWS Certified Solutions Architect Associate**, Amazon Web Services (AWS)

2024 **PantryPal Web App Hosted on Azure - Hackathon Winner**, OntarioTech University - Hackhive

Education

OTU (OntarioTech University)

Ontario, Canada

B.S. IN COMPUTER SCIENCE

- Received President Scholarship which is given to promising students in Faculty of Science.

Seneca (Seneca Polytechnic College)

Ontario, Canada

ADVANCED DIPLOMA IN COMPUTER PROGRAMMING AND ANALYSIS

- Deployed a full stack web application targeted towards healthcare professionals spreading public health awareness as capstone project with a team of 4 for 8 months.

STRCHS (St. Robert Catholic High School)

Ontario, Canada

ONTARIO SECONDARY SCHOOL DIPLOMA

- Peer tutored 15+ students for 2 years in Science, Math and Tamil.
